American Power Pull load binders are specifically designed for greater safety with all loads. High quality steel provides strength and dependability. All American Power Pull load binders are heat-treated. Chain links are electric welded for flexibility.

The handle and components are carefully balanced for easy handling. Ball and socket construction provides flexibility and straight line pull on the load. The Light Duty Mini & Samson Mite binders are for use with 1/4" chain and are ideal for cross chain tightening, gate fastening, chain or cable fastening and rope tightening.

The ratchet style load binders offer all-steel construction, drop forged steel components, and spring loaded pawls that provide infinite adjustment.

All American Power Pull load binders come with a 5 yr. warranty
